

# **Test: Internet Indexing Systems vs List of Known URLs: 2001**

## **Preface**

This is a compilation of the tests done in 2001 by the author on the then existing search engines. The search engine scene had changed and some of the engines from 1997 were not to be found with some new entries. It was published on the web on the authors home page. As the web pages changed, this was pushed of into the old site and forgotten.

The original HTML pages were converted into PDF using LibreOffice in Aug 2022 and is placed in the Spectrum repository for the record! Who knows some one will find this of interest in the years to come

After 2001, the searching was monopolized, the results were not complete and one passed on to something else. As we know the situation today is such that one search engine is making a fortune and attempts to provide an alternative such as Cliqz could not survive!
